OTHER INGREDIENTS: Dicalcium phosphate, maltodextrin, gelatin, stearic acid, magnesium stearate, purified water, microcrystalline cellulose, glycerine, lactose (milk), silicon dioxide, caramel coloring. Contains shellfish. Made in a GMP facility that uses milk, soy, egg, peanuts.

INGREDIENT NOTES: Cetyl Myristoleate is patented by EHP Products (U.S. Patent #5,569,676).

DOSAGE: Unlike regular joint supplements, you only have to take a single daily dose of Animal Flex. Easy. Potent. Effective. Just take a pack of Animal Flex with any meal during the day and you're set—doesn't matter which meal it is. That's it. As a "core" or foundational supplement, use Animal Flex daily—on both training and non-training days. No need to "cycle" it.

PRODUCT NOTES: If you're smart, don't just use Animal Flex when you got a problem. You can and should use it to help prevent problems from arising in the first place. Think of Animal Flex as nutritional "insurance", like Animal Pak.

FEEDBACK: Wanna hear what others have to say about Animal Flex?

"In my squats, Flex has allowed me to go deeper in the hole and because I started going a little deeper I was able to increase my weights. Stiffness was considerably less after shoulder day or any benching, but was the most noticeable after a heavy squat session. My joints have a feeling of wellness, they feel healthier and at times I have a greater range of motion."
- David A., Richmond Heights, OH

"I absolutely love your product... Your Animal Flex helped me with the recurring pain I had in my left knee after a few hardcore squats or in my elbows after working my triceps. Continue the awesome work Animals!"
- M. Lamoureux, Canada

"I felt relief after 3-4 days of taking Flex. I think that it is extremely effective in a short period of time. I know that when I get up in the morning that the pain will not be as bad and that my knees are being taken care of."
- Robert S., Naperville, IL

"I have tendonitis in my left elbow. I altered my workouts to avoid those exercises that caused pain. By using Flex, I slowly increased my workouts back to normal and the pain has subsided."
- David N., Irving, TX
