Cysteine	2414 mg
Tyrosine	3133 mg
Histidine	1854 mg
Proline	5462 mg
Glutamine	16673 mg
Nonessential Amino Acids (NAAs)	
Aspartic Acid	10622 mg
Serine	5490 mg
Glycine	2401 mg
Alanine	4901 mg

TAKE YOUR BODY SCULPTING GOALS SERIOUSLY!

Start off with the right amount of proteins that are ready to contribute to your muscle building.

Drink two servings of Hyper Mass 5000 every day to supplement your daily intake of proteins that can contribute to gains in muscle mass.

When talking about intense muscle training, muscle power is of essential importance. We packed Hyper Mass 5000 with 3250 mg of Creatine Monohydrate in each serving. Creatine increases physical performance in successive bursts of short-term, high intensity exercise. The beneficial effect is obtained with a daily intake of 3 g of creatine.

HIGH CALORIE FOR BEGINNERS

Hyper Mass 5000 is a basic product recommended for beginners who are “struggling” with their high calorie intake. In order to pump up your calorie intake it might be easier to drink a delicious and creamy shake than to be constantly conscious about eating adequate amounts of food. Hyper Mass 5000 is easy to prepare.
