

MULTI-PHASE Technology

LIPO-6X is a powerful fat burner using a superior MULTI-PHASE technology. MULTI-PHASE technology combines rapid liquid capsule delivery with extended-release inside capsule technology. What this means is that LIPO-6X is a fat burner that has multiple release phases, both fast and extended.†

Phase #1 Rapid Release Liquid Capsule:
The outer liquid capsule of LIPO-6X ensures a rapid uptake of its appetite-suppressing, fat-burning and energy-promoting ingredients. Within minutes of taking LIPO-6X you will feel it working.†

Phase #2 Extended-Release Inside Capsule:
LIPO-6X continues to work over an extended period of time thanks to the slower release second capsule that sits inside the liquid capsule. Due to its delayed absorption the inside capsule extends the amount of time LIPO-6X is active.†

LIPO-6X offers speed and duration. A rapid onset of its fat-burning and energy-promoting effects, combined with an extended-release, will help ensure maximum results.†
