

DIRECTIONS: Mix one serving with 400 ml water. Drink a serving a day, preferably right after training. Use this product in conjunction with food as part of a healthy, balanced diet, not as a substitute for such.

"JUMBO means BIG! JUMBO means STRONG!" The original JUMBO was developed to help those with very fast metabolisms (skinny "hardgainers"), or people with extreme energy demands due to their activity levels. The nutrient ratios reflect these purposes. The popularity of JUMBO – stemming from its quality and results – warranted that we develop a specific formula for the more normal and athletic metabolisms, and for the demands of typical bodybuilding training. And the second member of the JUMBO family, JUMBO PROFESSIONAL was born!

In JUMBO PROFESSIONAL we shifted the ratio towards a higher protein percentage. While providing 52 grams of high-quality protein (more than JUMBO), the serving size is smaller: 162 grams. This obviously means that the carbohydrate and caloric yield of the formula is lower, because it's unnecessary to take in higher amounts for those people that fall under the specific body and activity types we had in mind when designing this product.

JUMBO PROFESSIONAL is designed with whey protein. Dietary proteins are the source of nitrogen and indispensable amino acids, which the body requires for tissue growth and maintenance. Therefore, JUMBO PROFESSIONAL contributes to the growth and maintenance of muscle mass.* Whey protein from milk is a so-called complete protein, because it provides the body with all necessary amino acids, including the 9 amino acids (i.e. Histidine, Isoleucine, Leucine, Lysine, Methionine, Phenylalanine, Threonine, Tryptophan, Valine) that are considered essential for life, because the body cannot synthesize them. Determination of the nutritional efficiency of protein in the diet is in most cases based on estimating the extent to which dietary protein nitrogen is absorbed and retained by the body and is able to balance daily nitrogen losses. Net Protein Utilisation (NPU) is the percentage of ingested nitrogen that is retained in the body, and the Biological Value (BV) gives the percentage of absorbed nitrogen that is retained. Biological Value is the product of NPU and digestibility. Whey protein has good digestibility and amino acid composition, thus it's Biological Value is great compared to other dietary protein sources like meat, fish, eggs or soy.

JUMBO PROFESSIONAL still features the "6-CARB" carbohydrate blend that includes oat flour, Palatinose™ and native waxy maize food starch.

The "JUMBO" extra ingredient matrix has been improved and increased in dosage! Each serving of JUMBO PROFESSIONAL provides a 6,600 mg dose of our proprietary "CREA-BOMB" multi-component creatine matrix* (6 types of Creatines)! At least a 3 g daily dose of Creatine is scientifically proven to increase performance in successive burst of short-term, high intensity exercise like weight training and interval cardio (so a half-serving already provides this benefit).*

We also added extra amino acids on top of the amounts coming from proteins, including essential ones.

In the "Micronutrient Support complex" you'll find Magnesium and Vitamin C in amounts that contribute to normal protein synthesis, to a reduction of tiredness and fatigue, to normal functioning of the nervous system (neurotransmission and muscle contraction including heart muscle), to the normal function of the immune system, to normal energy-yielding metabolism, to electrolyte balance, to normal collagen formation for the normal function of cartilage and blood vessels, to the protection of cells from oxidative stress, to the maintenance of normal bones and teeth, and have a role in the process of cell division.*

Finally, we also added BioPerine®, a patented black pepper extract.

*These statements have been scientifically proven by the European Food Safety Authority (EFSA) and authorized by the European Commission (EC).

Aspartame free formula!

Warnings: This product contains an absorption modifier that could affect your medications – consult your physician before use! KEEP OUT OF REACH OF CHILDREN! Don't exceed the recommended daily dosage.

Best before end: see on packaging. (MM/YYYY)

Batch number: see on packaging.

SCITEC NUTRITION®

JUMBO PROFESSIONAL

• 52 G QUALITY PROTEIN IN A 162 GRAM SERVING!
 • IMPROVED & INCREASED "JUMBO" EXTRA INGREDIENT MATRIX (12,225 MG)!
 • "6-CARB" CARBOHYDRATE BLEND WITH DIFFERENT CARBS INCLUDING OAT FLOUR, PALATINOSE™ & WAXY MAIZE STARCH!
 • 6 TYPES OF CREATINES! ESPECIALLY FOR MORE ATHLETIC BODY TYPES!

**NET WT: 1620 G
