DIRECTIONS: Take 2 capsules 2-4 times a day before and after training, and/or before going to bed. Use this product in conjunction with food as part of a healthy, balanced diet, not as a substitute for such.

Glutamine is the most abundant amino acid in the human blood. Glutamine may become conditionally essential in certain situations, including intensive physical training, when the body cannot meet its needs by synthesizing Glutamine. This conditionally essential amino acid can be provided by dietary protein intake and via supplements such as MEGA GLUTAMINE.

Store in a cool, dry place. Heat and sunlight may damage the bottle!

Caution: As with all exercise and nutritional programs, please consult your physician first. Keep out of the reach of children!

Best before end: see on packaging
