

THE BEST CARBOHYDRATE FOR ENERGY AND GLYCOGEN LOADING

VITARGO!

www.sporteda.com.ua

NET WT: 900 G

ORANGE

DIRECTIONS: Dissolve one serving in 400 ml of water. Use before, during and after training to enhance and prolong performance, and aid recovery. For carbohydrate loading purposes usage should be based on your lean body mass and carb depletion extent.

Vitargo® is a unique, patented high molecular weight carbohydrate from Swedish barley starch. It's specially formulated for elite athletes to provide a truly effective, problem free carbohydrate energy source for performance enhancement and glycogen loading.

Vitargo® has been clinically tested and compared with other ordinary carbohydrate sport drinks. The results showed that Vitargo® passes through the stomach 80% quicker, and that it replenishes muscle glycogen levels 70% faster!

What it all means is that:

- Vitargo® stays in the stomach for just a very short time and therefore does not cause discomfort during physical activity.
- Vitargo® provides usable energy the fastest.
- Vitargo® does not pull water from the body's reserves, quite the opposite, it can actually increase your hydration level by acting as a sort of a pump.
- Vitargo® guarantees the fastest and most complete glycogen loading!
- Vitargo® is significantly better than dextrose, maltodextrin, sucrose or any other kind of carbohydrate!

MOLECULAR WEIGHT OF DIFFERENT CARBOHYDRATES

Carbohydrate	Average molecular weight
Starch	>1,000,000
Vitargo®	500,000-700,000
Maltodextrin	1,000-10,000
Dextrose	180
